

UFUOMA OGHENECHOWE

Frontend Engineer • React / Next.js / GSAP / TypeScript

rukkiechowe@gmail.com • rukkie.vercel.app • github.com/rukkiechovwe • linkedin.com/in/rukkiechovwe

Frontend Engineer with 4+ years of professional experience building scalable, high-performance, production-ready web applications across diverse industries using React, Next.js, TypeScript, and GSAP, delivering polished, fully integrated products from concept to deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frameworks: React, Next.js, GSAP, Redux Toolkit, React Query

Styling: Tailwind CSS, CSS3, Material UI, Framer Motion

Tools: Git, GitHub Actions, Vite, Webpack, Figma, Vercel, REST APIs

PROFESSIONAL EXPERIENCE

ExodusAvia Group - Remote

August 2025 - present

Frontend Engineer

- Led frontend development across a suite of 5 aviation management apps – restructured the architecture, replaced all mock data with live API integrations, and implemented authentication end-to-end in collaboration with the backend engineers.
- Integrated REST APIs across all apps covering real-time chat, push notifications, calendar and timeline views, role-based user management, and full CRUD operations.
- Iterated through multiple client demo cycles, progressively resolving bugs and hardening the platform toward airline onboarding readiness.
- Delivered consistent UI/UX improvements based on stakeholder feedback, maintaining design coherence across 5 distinct user-facing products.

GoPrudy - Remote (Contract)

February 2025 - September 2025

Frontend Engineer

- Built core frontend features for a budgeting SaaS platform with AI-driven financial dashboards, transaction tracking, and receipt scanning functionality.
- Improved UI performance and reduced data-fetching latency by 40% by migrating to React Query with smart caching and background sync strategies.
- Integrated AI features to enhance predictive financial analysis, delivering personalised spending insights to users.
- Implemented GSAP-powered micro-animations that enhanced perceived performance and overall product polish.

Muzzlab Technologies - Lagos, Nigeria

July 2023 - January 2025

Frontend Engineer

- Developed a real-time car rental booking system with live inventory updates and payment gateway integration for Autogirl & Muvement.

- Built multi-step due diligence workflows (NDAs, payments, questionnaires), for GACN, automating previously manual processes and cutting admin task time by 60%.
- Collaborated with product and design stakeholders, iterating rapidly from Figma to production to deliver scalable frontend solutions across two major products.
- Drove code quality improvements by refactoring core modules and establishing component standards adopted across the team.

3RM - San Francisco - Remote (Contract)

November 2022 - May 2023

Frontend Engineer

- Built a scalable Telegram Relationship Manager for Web3 organizations, enabling real-time sync, follow-up assignment, and conversation tracking across thousands of chats.
- Translated Figma designs pixel-perfectly into responsive UIs, ensuring cross-browser compatibility and improving UX consistency across platforms.
- Boosted site load performance by 30% through aggressive caching and React code optimization.

Metadapp - Lagos, Nigeria - Hybrid

June 2022 - March 2023

Frontend Developer

- Delivered core Web3 features: Risk Management, Portfolio Management, Referral System, and Revoke Approval within a live DeFi dashboard.
- Integrated GraphQL APIs, Web3 APIs, and third-party services to enable efficient on-chain data retrieval and real-time updates.
- Reduced bug reports by 30% through systematic legacy code refactoring and stricter TypeScript typings.

EDUCATION

University of Benin, Edo state, Nigeria

Bachelor of Computer Science

January 2018 - March 2023
