

UFUOMA OGHENECHOWE

+2347014465165 • rukkiechowe@gmail.com • <https://linkedin.com/in/rukkiechovwe>

I'm a software engineer proficient in frontend development. I have 3 years professional expertise in frontend development with a solid background in computer science and a diverse industry experience.

SKILLS

Programming languages: Javascript/Typescript.

Frontend: HTML, CSS, React, NextJs, Vue, NuxtJs, Tailwind Css, Material UI.

Tooling: Git, Github action, Cypress.

Others: NodeJS, GraphQL, Firebase, Figma.

PROFESSIONAL EXPERIENCE

Muzzlab Technologies - Lagos, Nigeria

July 2023 - present

Frontend Engineer

- Played a key role in the successful development of a web application to automate manual processes enabling users to fill forms, make payments, and provide feedback. This greatly optimised operational efficiency and ensured high availability and reliability of services for users and administrators.
- Implemented features such as authentication, team management, and multi-stage due diligence processes. This included complex workflows for due diligence stages, such as request forms, online meetings, payment processing, NDA forms, and extensive questionnaires with file uploads.
- Utilised Redux Toolkit & React Query for state management, optimising data flow and maintaining application scalability.
- Partnered with stakeholders to gather requirements, iterate on designs, and deliver solutions that effectively meet business objectives and user needs
- Contributed to enhancing the overall application architecture, code quality, and deployment processes, fostering a culture of continuous improvement within the development team.

3RM - San Francisco Bay Area, USA

November 2022 - May 2023

Frontend Engineer

- Worked closely with team members at 3RM to implement a scalable architecture and develop a Telegram Relationship Manager, enhancing web3 organisations' ability to manage interactions on the Telegram platform more effectively.
- Developed and maintained flawless integration of Telegram into the company's website, introducing essential features such as Telegram syncing, follow-up assignment, and conversation tracking.
- Transformed mockups and wireframes into well polished, functional and responsive web pages, ensuring cross-browser compatibility and delivering a smooth, visually appealing user experience.
- Enhanced website performance by implementing advanced code optimization techniques and utilising caching mechanisms, resulting in faster load times and significantly improved overall user experience.
- Demonstrated remarkable efficiency and time management skills in a fully remote role, showcasing the ability to work independently and deliver high-quality results without requiring close supervision.

Metadapp - Lagos, Nigeria

September 2021 - March 2023

Frontend Developer

- Spearheaded the implementation of features such as Risk Management, Portfolio Management, Referral System, and Revoke Approval within the Metadapp web3 application.
- Optimised the entire codebase by meticulously improving and refactoring legacy code to adhere to null-safety and modern standards, resulting in better performance and an improved development experience.
- Collaborated effectively with team members to maintain the Metadapp Web3 dashboard, ensuring a seamless user experience and efficient presentation of information.
- Integrated GraphQL APIs, various third-party services, and Web3 APIs to elevate website functionality and enable efficient data retrieval, thereby enhancing overall user engagement.
- Conducted thorough testing and debugging protocols, quickly identifying and resolving frontend codebase issues to ensure a robust and error-free application.

Xigma - Benin city, Nigeria

April 2021 - August 2021

Frontend Developer Intern

- Led the design and implementation of the solar service website, enabling users to purchase solar services and equipment from home while providing solar tips to enhance engagement and effectively promote solar services.
- Designed the mobile interface to ensure a seamless, user-friendly and visually appealing experience for users accessing the solar service on their mobile devices.
- Initiated and led a training program for a cohort of 10 interns, delivering a comprehensive introduction to frontend development that fostered a collaborative learning environment and boosted team skill development.

EDUCATION

University of Benin, Edo state, Nigeria

Bachelor of Computer Science
